

OUR BOTTOM END WILL ROCK YOU TO YOUR CORE!

At FleetGenius®, extending the life of your containers protects your assets and makes your operation more profitable. FleetGenius Bottom Kits are the perfect solution to shore up your aging containers - addressing the rust and corrosion that can lead to early retirement. We've specially designed our end caps with reinforcements to ensure your containers look good... and perform like new. FleetGenius Bottom Kits are just one of the value-added components of our CORE X® Program.

The FleetGenius Core Exchange Program handles transporting old containers or compactors from their existing location, and delivering them to one of our eight strategically located facilities where they're evaluated for repair and refurbishment, or exchange for a brand new unit! Whichever is chosen, FleetGenius will complete the process and return the replacement unit, or hold it in inventory until you need it re-deployed. For all units that are determined no longer usable, FleetGenius will handle the end-of-life process with a sustainable method of recycling. Genius? No... FleetGenius.
